Sectors

Public Services / Leisure & Recreation

Client

NSW Department of Tourism, Sport and Recreation

Architect

Various

Services Provided

Asset and Facilities Management

Sport and Recreation Facilities, NSW

Australia's NSW State Government owns and operates major Sport and Recreation Facilities in various locations throughout the state. Altus Page Kirkland was contracted to develop an overarching 5-year Asset Strategic Plan, as well as individual Asset Strategic Plans for eleven Sport and Recreation Centres.

Key Challenges: The plan needed to align with each Centre's overall business plan; the Department's overall corporate and service delivery strategy, conform to the NSW Treasury Results and Services Plan and provide information in a compatible format for Treasury. The project involved thorough analysis of proposed asset strategies and the implementation of the NSW Government's total asset management framework to improve delivery of services.

Outcomes: A clear and concise plan that ensures investment in each Centre is appropriately managed over the long term and the identification of appropriate funding for each Centre's specific asset management needs.
